

Contents of Volume 31

Ando A → Sasaki K

Blum U, Haynes KE, Karlsson C: Introduction to the special issue 1

Boardman E, Greenberg DH, Vining AR, Weimer DL: "Plug-in" shadow price estimates for policy analysis 299

Chung W-M → Hsu C-I

Conrad K: Traffic, transportation, infrastructure and externalities. A theoretical framework for a CGE analysis 369

Diamandis PF, Kouretas GP, Tzanetos P: Modelling the choice of mode and estimation of the value of travel time savings for the case of the Rion-Antirion suspension bridge in Greece 473

Gaudry M → Mandel B

Gillen D → Levinson D

Greenberg DH → Boardman E

Haynes KE: Labor markets and regional transportation improvements: the case of high-speed trains. An introduction and review 57

Haynes KE → Blum U

Hsu C-I, Chung W-M: A model for market share distribution between high-speed and conventional rail services in a transportation corridor 121

Hsu C, Wu Y: The market size of a city-pair route at an airport 391

Inglada V → Rus G de

Jensen MJ, Leven CL: Quality of life in central cities and suburbs 431

Kanafani A → Levinson D

Karlsson C: Product development, innovation networks, infrastructure and agglomeration economies 235

Karlsson C → Blum U

Kobayashi K, Okumura M: The growth of city systems with high-speed railway systems 39

Kouretas GP → Diamandis PF

Leven CL → Jensen MJ

Levinson D, Mathieu JM, Gillen D, Kanafani A: The full cost of high-speed rail: an engineering approach 189

Levinson DM: Job and housing tenure and the journey to work 451

Mai C-C → Shieh Y-N

Mandel B, Gaudry M, Rothengatter W: A disaggregate Box-Cox Logit mode choice model of intercity passenger travel in Germany and its implications for high-speed rail demand forecasts 99

Martin F: Justifying a high-speed rail project: social value vs. regional growth 155

Mathieu JM → Levinson D

Nijkamp P, Reggiani A, Tritapepe T: Spatial choice behaviour: logit models and neural network analysis 411

Ohashi T → Sasaki K

Okumura M → Kobayashi K

Reggiani A → Nijkamp P

Robison MH: Community input-output models for rural area analysis with an example from central Idaho 325

Rothengatter W → Mandel B

Rothschild R: Product differentiation and cartel stability: Chamberlin versus Hotelling 259

Roy JR: A price-responsive framework for interregional input-output 285

Rus G de, Inglada V: Cost-benefit analysis of the high-speed train in Spain 175

Sasaki K, Ohashi T, Ando A: High-speed rail transit impact on regional systems: does the *Shinkansen* contribute to dispersion? 77

Schöler K: Tariffs, factor prices, and welfare in a spatial oligopoly 353

Shieh Y-N, Mai C-C: Demand and location decision of a monopsonistic firm 273

Tritapepe T → Nijkamp P

Tzanetos P → Diamandis PF

Vickerman R: High-speed rail in Europe: experience and issues for future development 21

Vining AR → Boardman E

Weimer DL → Boardman E

Wrede M: Local public goods, heterogeneous population, voluntary transfers, and constrained efficient allocations 217

Wu Y → Hsu C
